Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1 and 4-7, drawn to a method for producing hydrogen by reacting amorphous silicon with water.

Group II, claims 2 and 8, drawn to a method for producing hydrogen by reacting amorphous silicon with an alcohol.

Group III, claim 3, drawn to a method for producing hydrogen by reacting amorphous silicon with carboxylic acid.

The three groups of claims do not form a single general inventive concept since they do not share a special technical feature which defines a contribution over the prior art, in that the reactants water, alcohol and carboxylic acid are mutually exclusive.

Applicant is required to make a provisional election, even though this requirement be traversed.
